Protecting and Enhancing
your property

DURACOAT

Systems UK Ltd

15 Year
Guarantee

Duracoat offers a complete repair and decorative exterior coating system which gives a life long protective surface, thereby weatherproofing the structure of your home. The exterior coating system will completely reface your home's exterior walls regardless of surface condition allowing your house to breathe, so no more worries about damp walls, peeling paint, mould or bleaching.

Our exterior coating system has a flexible property which means that unlike ordinary exterior paints there's no cracking, flaking or peeling – giving your home that newly painted look, backed by a no quibble 15 year guarantee.

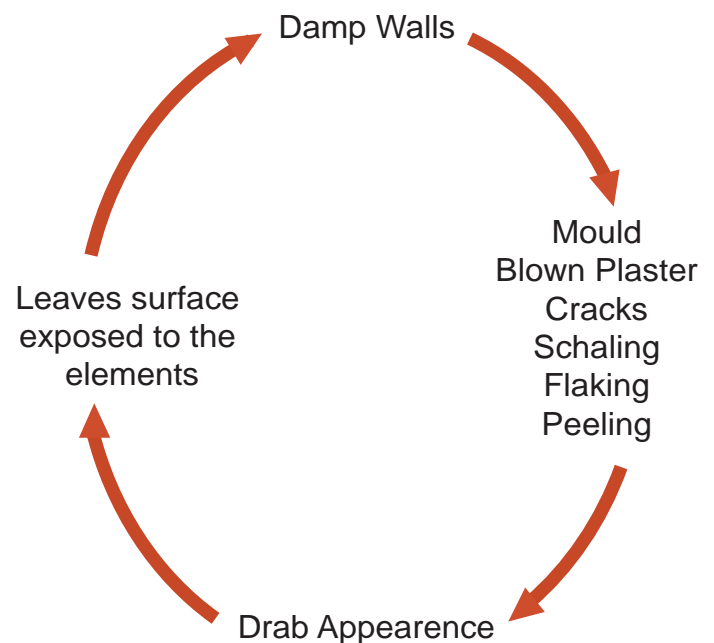

Duracoat breaks the Damage Cycle

The Damage cycle illustrates the downward spiral usually associated with exterior paints. Over time weather elements can cause damage to your property which in extremes can become structural and expensive to rectify. Duracoat wall coatings break this cycle through its unique waterproofing yet breathable properties.

Duracoat is not just a paint, it is an advanced flexible wall coating which is 20 times thicker than paint and is designed to withstand the elements.

No Cracking
No Flaking
No Peeling
Maintenance Free
Duracoat saves You Money

Duracoat Services

The Duracoat system uses advanced technology to ensure that your property is protected from all aspects of environmental damage. The success of this system is reliant upon the skills used during the application process. In order to ensure all Duracoat Masonary coatings are applied to strict standards, only approved and trained contractors are used.

Clear Coatings

Clearcoat is a colourless water-repellent formulated for porous exterior surfaces. Based on UV resistant resins, it is alkali resistant and can therefore be used in situations where other water repellents are not suitable i.e. newly pointed brickwork. It will not block pores in masonry so water vapour is able to escape, preventing the 'spalling' associated with less advanced products.

Smooth Coatings

Our smooth spirit based exterior coating has been specially formulated from Pliolite resin which provides excellent adhesion to the substrate and is rain resistant within 20 minutes – allowing all year round application. The water based smooth is based on a flexible vinyl acetate copolymer which cures to form a tightly adherent, decorative weatherproof membrane. It has excellent durability, good flexibility and a high alkali resistance. Being 20 times thicker than standard masonry paints, it's tougher and more durable, so that years later it will still be looking as good as new.

Textured Coatings

While the spirit based and water based coatings are hardwearing and waterproof, they are also breathable – which allows high levels of entrapped water to escape without blistering or delaminating. They also contain a special Anti-microbial system, which prevents the growth of mould. Not only does this make it maintenance free, but it also keeps its appearance bright and clean for years.

Mix and Match

Together with our popular range of standard colours, we have a bespoke Match and Mix service for a truly individual appearance. Simply just supply us with a swatch or terms of reference, and we will do our best to match it. All special colours are approximate to the colour specified.

"Duracoat has given a whole new look to the property and we are well pleased with the result" "the workmen were always informative about what they were doing and were pleasant and helpful, always willing to address any queries" "we have now received our certificate of guarantee for 15 years"

Mrs and Mrs Steenson - Dungannon

"Very efficient job, excellent result" "we would recommend Duracoat to anyone requiring similar work"

Mr Nied - Northumberland
